## Introduction

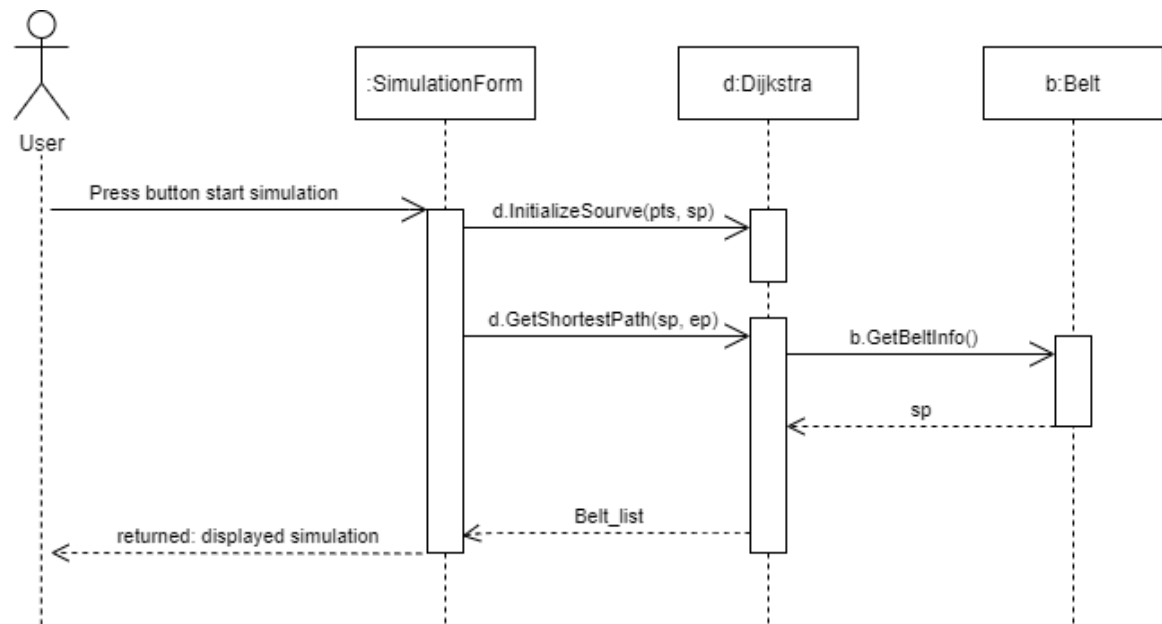

The purpose of the Design Document is to provide a description of the design of a system fully enough to allow for software development to proceed with an understanding of what is to be built and how it is expected to be built. The Design Document provides information necessary to provide description of the details for the software and system to be built.

# UML Class Diagram

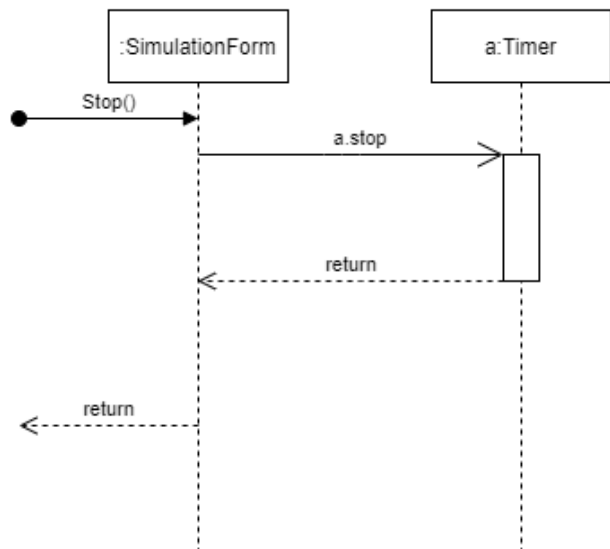

Note

## Non-trivial Sequence Diagram(s)

note: user presses btn to start simulation  
check if all necessary values are inserted to start simulation

The first sequence diagram illustrates the “start” function, and the second sequence diagram indicates the “stop” function
